

Amendments to The Specification

Please replace the paragraph (numbered 8 in the publication) extending from page 3 line 17-19 with the following new paragraph:

An optical part, here a rotating part, e.g., driven ~~Driven~~  
element 120 is shown in the path of the light beam 330, although  
it could alternatively be in the path of light beam 320 or even  
light beam 305.The path of the light beam defines an optical  
axis.
